

## Main5 Institute Expands Seminar Programme

**Main5 Institute for management personnel in the pharmaceutical industry is investigating areas of interest relevant to the pharmaceutical industry and using this as a basis to expand its training and learning programme**

**Frankfurt, June 25, 2018** – With four additional Business Seminars, the [Main5 Institute](#) is expanding its comprehensive training programme for the pharmaceutical industry. Under the leadership of Armin Neises, the Main5 Institute is preparing mid-level and senior management figures from the pharmaceutical industry for the challenges of a complex sector. The wide-ranging programme can be booked at selected event locations in the Rhine-Main region. The new seminars seamlessly complement the two seminars on "Successfully managing increasing complexity in the pharmaceutical context" and "Management system BPM - creating value in the GxP-regulated environment".

### **"Digitalisation in Life Sciences" Seminar Starting in 2019**

Flanked by Main5's holistic approach, the topics of these new Main5 Institute seminars are also based on the six poles of Strategy, Processes, Structures, Systems, People, and Culture. The key points of the topics were identified as part of a comprehensive customer survey and market study conducted by Main5. With the topic "[Self-Reflection and Meditation for Specialists and Managers](#)", Main5 becomes the first company to offer a seminar of this type specifically for the pharmaceutical industry. The 2-day seminar focuses on self-reflection and self-awareness as a basis for inner stability so that management staff can remain focused and capable of making decisions even in turbulent times.

Changes are continuous in our industry. However, many companies still find it a challenge to implement basic principles in their change processes in a safe and appropriate way. At the practical seminar "[Change Management in the Pharmaceutical Sector - Successfully Designing Changes](#)", participants will be shown ways to react appropriately to changes at pharmaceutical companies.

With its focus on the topics of "[Pharma Management Skills](#)", the Main5 Institute is forging a bridge between a demanding, technical level of management, and a sensitive, humanistic level. Relevant socio-economic approaches for specialists and management will be taught which can be successful in an environment dominated by life sciences.

From 2019, we will offer our fourth seminar, "Digitalisation in Life Sciences - Get Prepared for Future Challenges".

### **Exclusive Focus, Directed Towards Your Needs**

What's special about Main5 seminars, and where their benefit lies, is quite clearly that they focus exclusively on the challenges faced in the pharmaceutical industry. With the content of the further training workshops offered, Main5 is reacting to the needs of the pharmaceutical sector, where growing, and ever-changing, regulatory demands are king. With its expanded programme of seminars, the Main5 Institute is once again making waves and focusing further on company development in its selected niche.

**Main5** ([www.main5.de](http://www.main5.de)) was established in 2013 as a Management Consulting firm and focuses on strategy, process and solution consulting with international life science companies in the regulated R&D sector. The consultants at Main5 combine their methodical and systematic approach with years of experience in the pharma industry. The holistic approach, which places the primary focus of the route to the digital future on people, is also used to implement complex ideas from leading industry customers. The Main5 Institute supports

specialists and management personnel in knowledge and research-intensive company sectors with a range of seminars.
